

### **A Man and a Boat make History**

*78 days alone on the vastness of the Atlantic Ocean made a hero of Robert Manry when he arrived in England safe and sound on 17th August. A journalist from Cleveland, Ohio, Mr. Manry had determined to make the voyage since he was at High School. Scepticism was great but in spite of the fact that he had some lucky escapes, he succeeded, and stands as a proof that the pioneering spirit on this planet is not lost in the days of the space rocket.*
